The first three Adelantado sit somewhere between time management and casual city-building sim, with long, sprawling levels with lots of freedom in placing buildings and a focus on exploration. I have quibbles with some of their design and story choices, but their unusualness made them interesting and memorable.

Adelantado 4, on the other hand, is basically a reskinned Roads of Rome: New Generation, with short levels and very little freedom, and missing the exploration aspect that I liked so much about the earlier games in the series. It's fine for what it is, but if I wanted Roads of Rome: New Generation, I would've just bought that instead.. Gameplay is nothing like the Adelantado Trilogy, but it looks the same. Don't be fooled - unless you just love to look at it and not actually play it.
