About This Game

Create your own convict and attempt to survive in a prison where every sentence threatens to be a "death" sentence! Rub shoulders with up to 100 fellow inmates in a sprawling facility of 12 unique areas, each filled with fully interactive furniture and props. Plus a life beyond the gates populated by real civilians, with wardens enforcing dozens of different laws to keep you as far away from it as possible.

Staying sane is just as important as staying alive, as you balance mental health with physical health to get through each day in real-time. Develop unique relationships with every other character - from friendships and romances to rivalries and gangs - and live long enough to see them change over time, with a constant turnover of new faces.

This special desktop release is fully unlocked as standard, allowing you to save your changes to all characters to make the world your own. Extensive controller support even opens up multiplayer opportunities - where a fellow human can take control of someone else on the scene to help or hinder the star player!

This is a nice route, gives you that Florida feeling. The CSX C40-8W's as we all know should have a different horn and bell with it. But other than that it's pretty cool.. Dead game.... Fun game! Another great release by RedZone! I enjoy match 3 games, and this one did not disappoint. The visuals are great, as well as the challenges of each level.

If you're looking for a fun and relaxing game, this is it! I can't wait to continue expanding my bakery!

My only suggestion to the developer would be to add more levels. Maybe an update in the future? Overall, great game!. Simply a good game. Nothing much to say, it delivers what it promises, and does it well. The price point is a bit above what it should be, but it's still worth a purchase.. I have been a huge fan of Tower Defenses since the days of Warcraft 3. This game is probably the closest game I have seen to Gem TD which is easily my favorite tower defense game . The layouts of the maps change each level and it allows you to switch up the maze. Solid game for the money, if you like tower defenses and liked Warcraft 3 tower defenses, buy this game.. This is a delightful fishing game, reminiscent of Stardew Valley in music and general feeling. It's more grindy than Stardew Valley -- the main thing you do is fish, although there are quests, a garden, and a kitchen island. I'm only three hours in, so this is a very sketchy review. Rule with an Iron Fish is relaxing, pretty, has funny jokes and pretty music, and is a soothing game to play at the end of a long day.. Simple, fun, easy and straightforward fun, this game is pretty much the same as the first part with some improvements and around 100 new levels.

Major improvement was the level editor, now you can make your own levels, besides that there are new obstacles and items to use which spice up the gameplay, but still leave it true to the game's name. You can change the colors of your character now.

Also its important to mention that it removes the 3 lifes per chapter from the prequel of this game. Now you can die as many times as you want and you will be returned to the beginning of the level you died on. This means this game is easier compared to first part.

Pros:

- Simple and fun
- 60fps
- Level editor
- Well upgraded compared to part 1

Cons:

- Still lacks achievements

Nice game!

Its only annoying that you can't save your progress when you die, but it's not that long game so I don't have anything to complain.. stress killer, last achievement almost impossible. (300+ Mice) in a row is a bloody bath mate. This game has some positives and negatives just like other games.

Positives:

It's a well made game
The idea is cool
Creepy

Negatives:

The hands at the beginning.
Sometimes he kills you right away, but sometimes he takes you to the execution room where, after a long wait, he kills you.
I'm not sure if it's even possible to get away from him with sprinting.
The tesseract is a cool idea, but is annoying. Once I got to where it turned blue I couldn't get the door to open, no matter what I looked at, plus you move slower.
It's like he has superhuman abilities, he can see you when you can't see him, you can't hear his footsteps.
If you have your flashlight off, that should make it harder for him to find you, but it seems he finds you easier with it off.

I know there's a ton more negative than positive, but it's still fun to play.

. ran slow, didn't give enough hints or really a clue what to do and was just generally really annoying to try and play. "In what room do you take a shower?" level bad.. Likes:

- + Responsive controls
- + Simple but satisfying combat
- + Sword Spin move to lop enemy's heads off never grows old
- + Nice variety of enemies
- + Challenging but achievable
- + A decent variety of Items and weapons available
- + Different playable characters
- + Pixel art
- + Great retro music

Dislikes:

- Music has no volume slider
- Different characters do not have drastically different playstyles

This roguelike platformer has tight controls, satisfying combat, and is challenging without making you rage. It's simple enough to grasp with a skill ceiling that doesn't soar too high.

If you're interested in seeing more gameplay, I've started a Let's Play series:

https://www.youtube.com/playlist?list=PLwIDRHkaAZ23w-jQSUjdyWn12LkLR_d3f. Oh, Oh, OH! This is a blast. Incredibly intriguing game, the art style is fantastic, the character customization ON THIS ART STYLE is so great. Really engaging puzzles that are always more complicated than they first appear, my brain feels ALIVE after spending a few hours on this. Can't wait to dive into it more and really looking forward to how this progresses towards its full release!

TL;DR FUN, LOOKS GREAT, SOUNDS GREAT, GIVE IT DA MONIES.. This game is seriously awesome! It's similar to SMB1, but with some element differences. The main one being that Marisa gradually grows. Rather than just having a big and small form, Marisa grows another head tall depending on how many mushrooms she has. At four heads, she gets a projectile move, and at 8 heads, she is temporarily large enough to charge through everything, similar to the mega mushroom from the Mario series.

I really love the art style of this game. The pixel art is extremely vibrant, cute, and detailed. The music is fun, upbeat, and matches the mood of every level! This sort of variety in game styles is really why I started to like Touhou. Marisaland Legacy is a fun, unique, and cute take on an age-old classic like SMB1. I would recommend it to anyone!.
