### On the basis of solution, hardware is expected to exhibit the highest CAGR through 2025

Surging demand from several industries, such as retail, BFSI, healthcare, automotive & transportation, media & advertising and manufacturing worldwide has led to burgeoning market growth of hardware solution. This segment typically includes chipsets, such as central processing unit, graphics processing unit, application specific integrated circuit as well as the field-programmable gate array. Apart from this, the technological advancements, such as superior computing power, parallel computation capabilities and more storage capacity in AI-enabled hardware products are further likely to drive the growth of this segment.

### On the basis of technology, deep learning segment cornered the market in 2016

Deep learning segment captured the largest share in artificial intelligence market globally due to its increased usage across various industries, such as BFSI, automotive as well as media &
